

CONCRETE CHANNELS

Drainage and Utility Management

CONCRETE CHANNELS

The concrete channel can be used for a variety of applications, suitable for drainage or for the protection of utilities. Channels come complete with a concrete lid or GRP grating lid, depending on intended use and loading. All lids are removable for ease of access for maintenance and repairs if required in the future.

The SPS Concrete channel is manufactured to BS EN Standards from high strength concrete, with fixed lifting points for safe and easy handling.

Great Yarmouth and Dundee branches stock standard size units allowing for a fast turnaround from order to delivery.

- Waste Channels
- Water Flow
- Concrete Ducts
- Service Channels
- Cable Protection
- Slurry Channels
- Soakaways
- Road Network
